

## Profile

Experienced web software engineer with over 5 years of experience and a Computer Science educational background. Focused on front-end innovation and well established business logic solutions. Working towards delivering measurable, documented, quality and in-time results. Hands-on experience includes a range from creative advertising/media agencies to custom B2B and B2C projects in various business environments. All these has led me into a specialisation in web development including building complex rich-client as well as web-based user interfaces and applications.

---
